

Engineering

Pre – Apprenticeship Programme

You are about to embark on a Pre-Apprenticeship Programme which, when successfully completed, will increase your employability in engineering.

What is the content?

- ▲ Engineering principles and techniques and environment awareness
- ▲ Working safely in an engineering environment
- ▲ Working efficiently and effectively in engineering
- ▲ Using and communicating technical information
- ▲ Introduction to working in engineering
- ▲ Plus 3 further units from a selection of Welding, Fabrication, Machining/CNC, CAD/CAM, Electrical/ Mechanical Maintenance and Electronics.
- ▲ Functional Skills

What will you achieve?

The Programme will provide practical 'hands on' training and education to enable individuals to achieve the following qualifications:

- ▲ Performing Engineering Operations NVQ Level 1
- ▲ Diploma in Engineering VRQ Level 2
- ▲ Functional Skills - Maths, English or IT Level 1
- ▲ Certificate in Preparation for working in the Engineering Manufacturing Industry Level 2

How long is the programme?

The Programme is planned over a 20 week period comprising 4½ days a week.

Where can you go next?

- ▲ Progression onto an Apprenticeship
- ▲ Progression to employment
